PROFESSIONAL SUMMARY

Computer Science student and AI developer passionate about building practical technology that solves real problems. Interests span machine learning, natural language processing, backend engineering, and AI-powered applications. Founder of AceBot — a WhatsApp AI assistant designed to help African businesses automate customer conversations and support workflows. Experienced in teaching Data Science and Machine Learning during a formal internship. Focused on creating AI solutions that are useful, accessible, and impactful across African communities.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science

Expected: November 2026

Abubakar Tafawa Balewa University, Bauchi

◆ CGPA: 4.25 / 5.00

EXPERIENCE

Founder & AI Developer — AceBot

February 2026 – Present

- ◆ Designing and developing an AI-powered WhatsApp assistant for African SMEs.
- ◆ Building backend services using Python, FastAPI, and MongoDB.
- ◆ Implementing conversational AI workflows powered by modern LLM technologies.
- ◆ Integrating business automation features through WhatsApp communication channels.
- ◆ Deploying and testing application components using Railway.
- ◆ Leading product design, architecture decisions, and technical development as a solo founder.

Data Science & Machine Learning Instructor (Intern) — Nascomsoft

January 2025 – December 2025

Embedded Hub, Bauchi

- ◆ Assisted in teaching Data Science and Machine Learning concepts.
- ◆ Guided learners through Python programming and machine learning workflows.
- ◆ Supported practical projects involving data preprocessing, model training, and evaluation.
- ◆ Contributed to hands-on workshops and technical learning sessions.

PROJECTS

Student Dropout Prediction System

- ◆ Built a machine learning model to identify students at risk of dropping out.
- ◆ Performed data cleaning, feature engineering, and model evaluation.
- ◆ Technologies: Python, Pandas, Scikit-learn
- ◆ GitHub: <https://github.com/lyimoga/Students-Dropout-Predictor>

<https://github.com/lyimoga/Students-Dropout-Predictor>

Email Spam Detection System

- ◆ Developed a spam classification model using NLP techniques and machine learning.
- ◆ Applied TF-IDF vectorization and model evaluation methods.
- ◆ Technologies: Python, Scikit-learn, NLP
- ◆ GitHub: <https://github.com/lyimoga/Email-Spam-Detector>

NBA Player Salary Predictor

- ◆ Built regression models to estimate player salaries using historical performance data.
- ◆ Explored Random Forest, XGBoost, and other predictive techniques.
- ◆ GitHub: <https://github.com/lyimoga/Add-NBA-Salary-Predictor>

Chatbot Project

- ◆ Developed a conversational chatbot application using Python.

- ◆ Explored chatbot design principles and interaction workflows.
- ◆ GitHub: <https://github.com/lyimoga/Chatbot-project> <https://github.com/lyimoga/Chatbot-project>

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, SQL

Machine Learning & AI: Scikit-learn, TensorFlow, Deep Learning, NLP, RAG, LLMs

Backend Development: FastAPI, Flask, REST APIs

Databases: MongoDB, SQL, SQLite3

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Railway, Streamlit

AI Ecosystem: Hugging Face, LangChain, ChatGPT, Claude, Mistral

CERTIFICATIONS

- ◆ IBM – Introduction to Deep Learning <https://coursera.org/share/6a190da6578bb742472f100fca92880e>
- ◆ AI & Career Essentials (AiCE)

AREAS OF INTEREST

Artificial Intelligence | Machine Learning | Deep Learning | Natural Language Processing | Generative AI | AI Agents | Backend Engineering | Applied AI for African Businesses
