PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with hands-on experience designing, developing, and deploying intelligent applications using Python, FastAPI, Scikit-learn, TensorFlow, and modern Large Language Model (LLM) technologies. Experienced in building predictive machine learning systems, natural language processing applications, backend APIs, and AI-powered web solutions that address practical challenges.

Alongside software development, I mentor learners in Data Science and Machine Learning through practical, project-based instruction, helping them translate theory into real-world solutions. I enjoy developing scalable AI applications that combine machine learning, backend engineering, and modern language models to create meaningful impact.

CORE COMPETENCIES

Machine Learning • Deep Learning • Natural Language Processing • Backend Engineering • REST API Development • Model Deployment • Prompt Engineering • Retrieval-Augmented Generation (RAG) • Data Analysis • Problem Solving • Technical Communication • Team Collaboration

TECHNICAL SKILLS

Programming Languages

Python • Java • SQL • C/C++

Artificial Intelligence & Machine Learning

Machine Learning • Deep Learning • TensorFlow • Scikit-learn • Natural Language Processing (NLP) • Large Language Models (LLMs) • Retrieval-Augmented Generation (RAG) • Prompt Engineering

Backend Development

FastAPI • Flask • REST APIs

Databases

MongoDB • SQL • SQLite

Cloud, Deployment & Developer Tools

Railway • Streamlit • Hugging Face Spaces • Git • GitHub • Google Colab • Jupyter Notebook

AI Platforms

ChatGPT • Claude • Hugging Face • LangChain • Mistral

EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science

Abubakar Tafawa Balewa University, Bauchi, Nigeria

Expected Graduation: **November 2026**

CGPA: **4.25 / 5.00**

PROFESSIONAL EXPERIENCE

Independent AI Developer

February 2026 – Present

Design and develop intelligent conversational applications that automate customer interactions for small and medium-sized businesses. Build backend services using Python, FastAPI, and MongoDB while integrating conversational AI workflows, REST APIs, and cloud deployment through Railway. Continuously refine application architecture, usability, and performance as part of an ongoing software development lifecycle.

Data Science & Machine Learning Instructor (Intern)

Nascomsoft Embedded Hub, Bauchi, Nigeria

January 2025 – Present

Support the delivery of Data Science and Machine Learning training through practical instruction and mentorship. Guide learners in Python programming, data preprocessing, feature engineering, model development, evaluation techniques, and project implementation while encouraging software engineering best practices and analytical thinking.

SELECTED PROJECTS

Text Generator

Developed an interactive AI text generation application that enables users to generate text from prompts through a simple web interface.

Technologies: Python • Gradio • Hugging Face Spaces

Live Application:

<https://huggingface.co/spaces/Iyimojoe/text-generator>

Student Dropout Predictor

Developed a machine learning application that predicts students at risk of dropping out using data preprocessing, feature engineering, and supervised learning techniques.

Technologies: Python • Scikit-learn • Streamlit

Live Application:

<https://students-dropout-predictor1.streamlit.app/>

Email Spam Detector

Built a natural language processing application capable of classifying email messages as spam or legitimate using machine learning and text vectorization techniques.

Technologies: Python • Scikit-learn • NLP • Streamlit

Live Application:

<https://email-spam-detector1.streamlit.app/>

NBA Player Salary Predictor

Designed a regression-based machine learning application that predicts NBA player salaries using historical player performance statistics.

Technologies: Python • Scikit-learn • XGBoost • Streamlit

Live Application:

<https://nba-salary-predictor.streamlit.app/>

AceBot – WhatsApp AI for Small and Medium-Sized Businesses

Developing an AI-powered WhatsApp assistant that combines conversational AI with backend services to support customer communication and business operations.

Technologies: Python • FastAPI • MongoDB • Railway • Meta WhatsApp API

Live Application:

<https://impartial-laughter-production.up.railway.app/app/index.html>

CERTIFICATIONS

IBM – Introduction to Deep Learning

Credential:

<https://coursera.org/share/6a190da6578bb742472f100fca92880e>

AI Career Essentials (AiCE)

Credential:

https://drive.google.com/file/d/1921MbRDFSnvJH92RaNYRPMkcnqMBWIDD/view?usp=drive_link

Huawei Cloud Computing Certificate

Credential:

https://drive.google.com/file/d/1FKAL07Ve-N8wrt80tdkqydzJB_vl0Nu7/view?usp=drive_link

ACHIEVEMENTS

Developed and deployed five AI-powered web applications spanning machine learning, predictive analytics, natural language processing, conversational AI, and generative AI.

Maintained a cumulative CGPA of **4.25 / 5.00** while balancing academic studies, software development, technical instruction, and independent learning.

Mentored learners in Data Science and Machine Learning through practical, project-based instruction, helping them strengthen their programming and analytical skills.

AREAS OF INTEREST

Artificial Intelligence • Machine Learning • Deep Learning • Natural Language Processing • Large Language Models (LLMs) • Agentic AI • Generative AI • Backend Engineering • Applied AI for African Businesses
